SIC offers standard and made to order carry bags, radio harness and Mil-Standard portable equipment cases for electronics equipment. Our main objective is to meet with the requirements of our customers offering competitive prices and short lead time.

Harness ST-138/PRC-25

The cotton duck ST-138 (Accessory Bag) electrical equipment harness is designed to allow the PRC-25/PRC-77 radio to be carried on the operator's back. The radio is supported by a pair of metal braces and fastened to the harness by two retaining straps. Constructed by webbed cotton material, the ST-138 is used to carry a receiver-transmitter on the user's back. Loops on one side of the harness provide for the attachment of the equipment bag CW-503/PRC-25. If KY-38 Encryption Module/Device is required to be carried along-with PRC-77 radio, the metal pack board is necessary. The metal pack board mounted on the Lightweight Rucksack frame and features two cargo support shelves and four nylon cargo straps. The upper shelf is designed for carrying the PRC-77 radio, whilst the KY-38 encryption device sat on the lower support.

Antenna Bag CW-503/PRC-25

The cotton duck CW-503 bag is sectionalized /divided into several pockets designed to store the handset and two whip antennas along-with antenna support bases used for PRC-25 & PRC-77 radios. The front flap is covered with both of the main pockets.
